COMMONWEALTH OF MASSACHUSETTS
EXECUTIVE OFFICE OF ENVIRONMENTAL AFFAIRS
DEPARTMENT OF ENVIRONMENTAL PROTECTION
ONE WINTER STREET, BOSTON, MA 02108 617-292-5500

WILLIAM F. WELD
Governor

ARGEO PAUL CELLUCCI
Lt. Governor

The Massachusetts Recycling Coalition

TRUDY COXE
Secretary

DAVID B. STRUHS
Commissioner

June 1997

Dear Reader:

The Massachusetts Department of Environmental Protection (DEP), the Executive Office of Environmental Affairs (EOEA), and MassRecycle are pleased to provide you with the *1997 Statewide Municipal Recycling and Composting Guide* (The Guide). The Guide provides information on the following: the recycling contact person for each town, their phone number, the type of recycling program (s), the materials accepted, as well as general information about the type of trash collection and composting programs.

The Guide is designed to be an easy-to-use reference for recycling coordinators, municipal planners, and administrators. The Guide is an excellent tool to use when making changes and improvements to your community recycling and composting programs. We encourage you to contact other cities and towns, to share information, and benefit from the experiences of others in developing successful recycling programs.

We would like to thank Craig Ruberti, ECall: "The Massachusetts Recycling Hotline", and NYNEX Informational Resources, Inc. for their time and assistance in developing this Guide. It is through collaborative efforts like this that we will move forward toward realizing Massachusetts' diversion goals of 46% by the year 2000.

If you need additional copies, or have questions about the Guide, please call MassRecycle at (617) 338-0244.

1996-97 Massachusetts Recycling Facts

General Massachusetts Solid Waste Facts

- Massachusetts has 351 cities and towns with a **total population of about 6.2 million** residents.
- The average Massachusetts resident generates about 6 pounds of trash a day, 42% at home and 58% at work. About 7 million tons of municipal solid waste was generated statewide in 1996. **Nearly 33% of this waste was recycled or composted.**
- In 1990, the Commonwealth set a recycling goal of 46% (recycled and composted) by the year 2000.
- The first step of our recycling goal is to provide people with the same access to recycling as they have to trash disposal. There has been strong growth in both the number of recycling programs and the types of materials collected. In 1990, 20 communities provided their residents with curbside recycling service. Today, 148 communities offer curbside recycling service to 75% of the state's population.
- The second step is to ensure that people participate in their local recycling programs. DEP encourages participation by assisting municipalities implement unit-based pricing of solid waste, providing consumer education materials, and offering educational assistance.
- Recycling and composting provide important environmental benefits by reducing the need for solid waste disposal capacity, conserving natural resources by reducing the use of virgin materials, and converting organic wastes into a beneficial resource. **Recycling industries generate over \$600 million in value and support over 12,000 jobs in Massachusetts.**

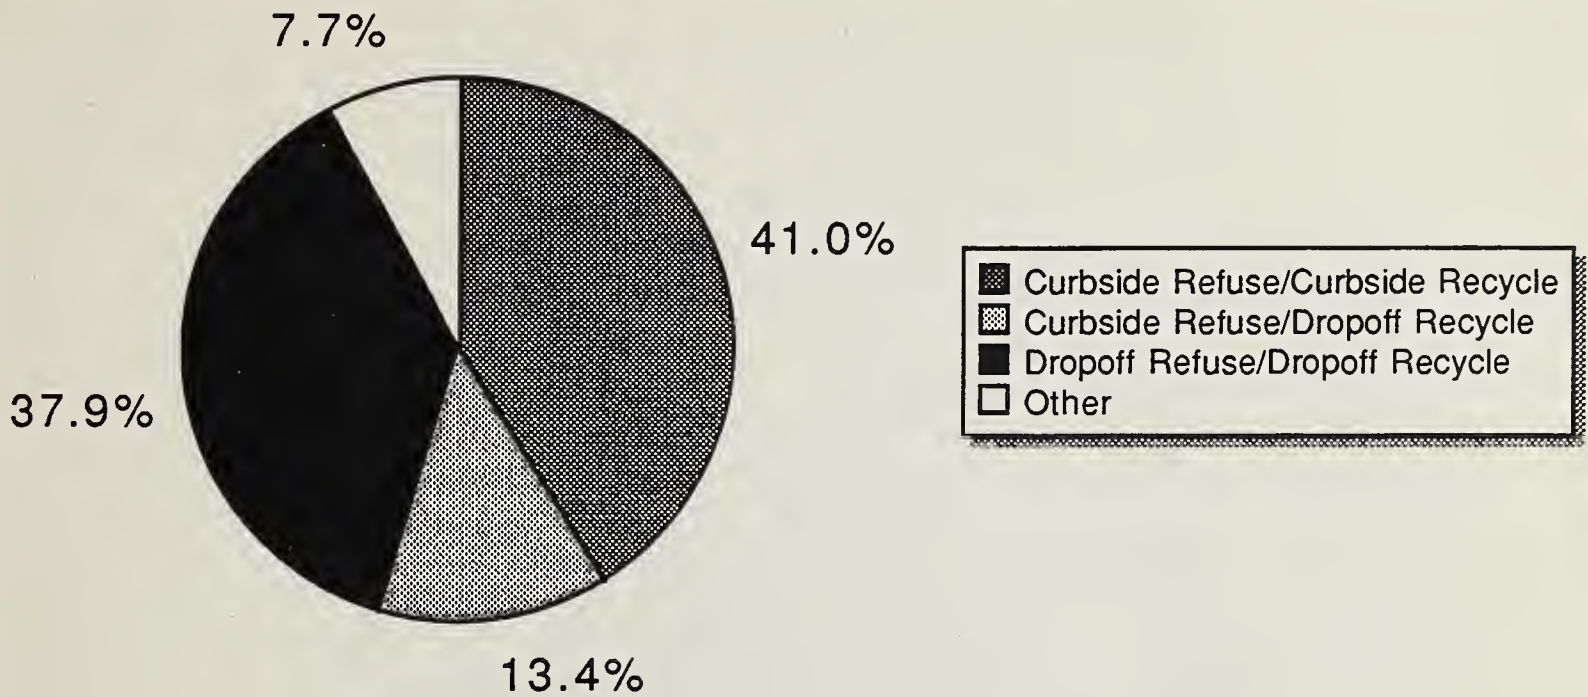

Access to Recycling

- **Parallel access:** 4.7 million residents (75% of the population) have municipal curbside pickup of trash and recyclables. 1.2 million residents (21% of the population) take their trash and recyclables to a drop-off facility. Another 3% of residents pay a hauling company to pick up their trash and recyclables at the curb.
- **Unequal access:** Many residents in apartments or condominiums are not offered municipal recycling service. Municipalities often set a limit on the size of a building they service.
- Newspaper recycling programs exist in 341 communities in Massachusetts. Municipalities serving 98% of the state's residents provide newspaper recycling services. Curbside newspaper recycling is available to 4.8 million residents (77% of the population, while 1.3 million residents (21% of the population) must take their newspapers to a drop-off facility.
- Magazines are collected for recycling by 307 cities and towns- 141 of these communities have curbside collection. These 307 cities represent 5.6 million residents (90% of the population) and 70% recycle magazines at the curb.
- Aseptic and waxed containers are collected by towns serving 2.7 million residents (44% of the population).
- Paperboard, junk mail, and corrugated cardboard are less commonly accepted materials. Paperboard can be recycled by 55% of residents in a curbside program. Junk mail can be recycled by 5 million residents (80% of the population) in 276 communities. Three point seven (3.7) million residents (61% of the population) have curbside collection of cardboard, 28% have drop-off access, in 305 communities.
- Glass is the second most commonly recycled material in Massachusetts. There are a total of 333 communities in the state that include glass in their recycling programs. Curbside collection is offered to 74% or 4.5 million residents.
- Recycling of #1 plastic is available to 5.8 million residents, while just over 6 million have access to #2 plastic recycling. Approximately 72% of residents can recycle #1 and #2 plastics at the curb, while 24% have drop-off access.

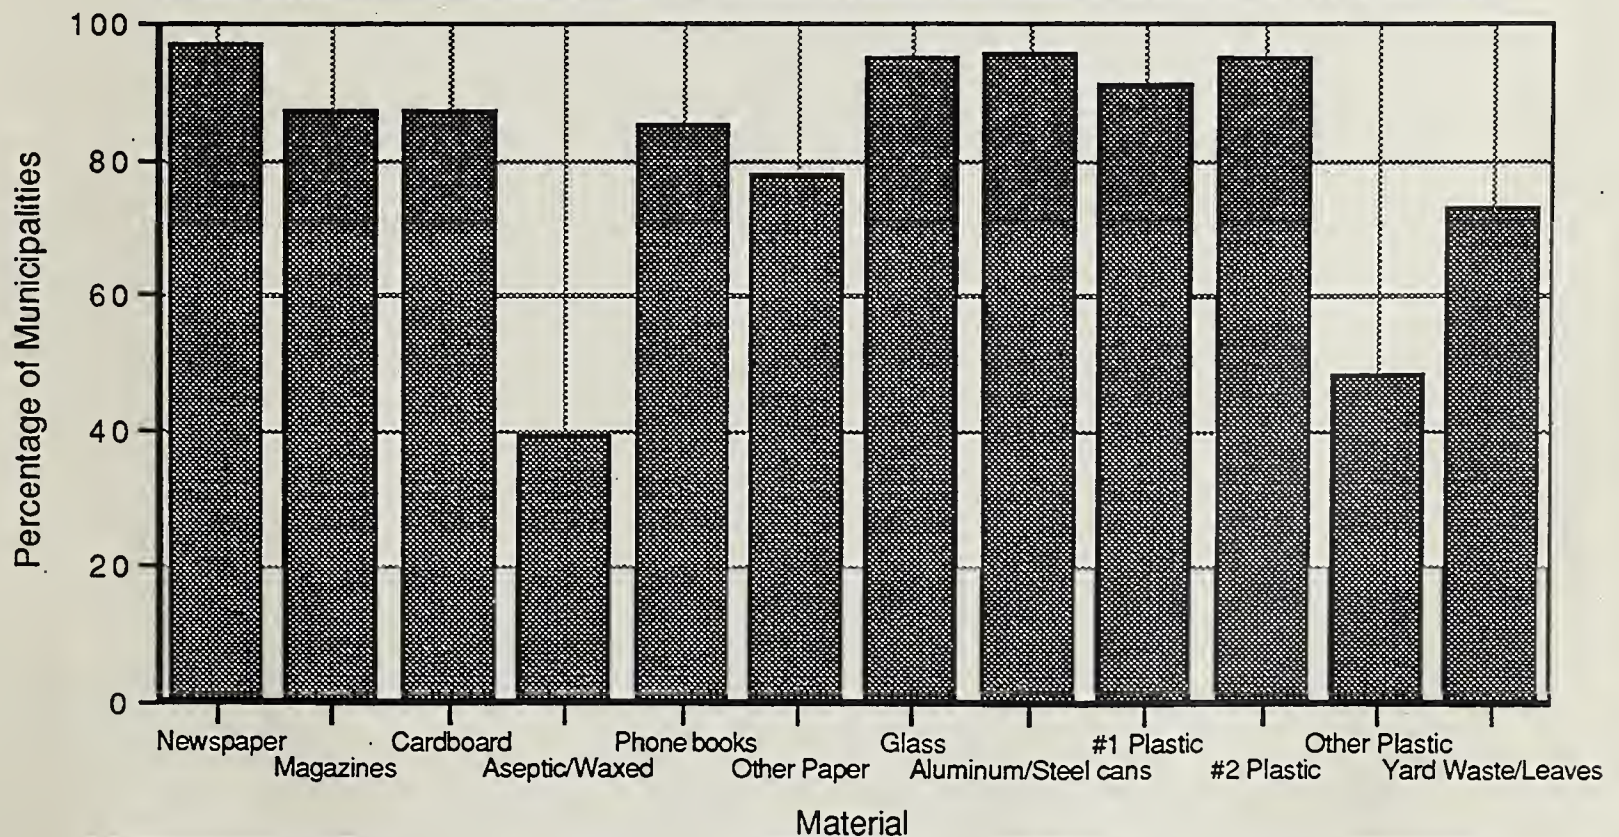

Participation

- The Recycling Participation Campaign (RPC) is a statewide consumer education initiative that includes cities, industry, environmental organizations, and state government. The RPC is designed to influence consumer recycling behavior through an integrated advertising and public relations effort targeted at individuals who have access to, but do not participate in a municipal recycling program. RPC research indicates that between **21-27% of residents do not recycle any commonly accepted materials.**
- Participation rates in individual programs range from 25-70%, with some of the most populated cities having the lowest rates. A focus of the Recycling Participation Campaign will be to increase participation rates in the state's larger communities.
- The REAPS Program (Recycling Education Assistance for Public Schools) provides services to increase recycling in public schools, grades K-12. Services include classroom presentations, teacher training sessions, and technical assistance services to implement school recycling programs. Last year, REAPS provided 307 classroom presentations statewide, and 15 teacher training sessions.
- The DEP Municipal Recycling Grants Program provided residents with over 2 million customized consumer materials listing municipality-specific information.
- Unit-based pricing of solid waste has been adopted by 75 communities (12% of the population). DEP provides technical assistance and grants to municipalities in order to implement this type of program.

Sources of Recycling Information

Aluminum Association

Washington, D.C.

(202) 862-5100

Provides market information and promotes aluminum recycling.

American Forest and Paper Association (AFPA)

Paper Information Center

Washington D.C.

(202) 463-2700

Provides market information, publications, videos, and other resources about the paper industry.

American Plastics Council

(800) 2-HELP-90

Provides market information on recyclable plastics and offers technical assistance for establishing recycling programs.

American Recycling Markets

Ogdensburg, NY

(800) 267-0707

Call to order a Guide (subscription fee) with information on recycled products, recycled material markets, and recycled product procurement.

Aseptic Packaging Council

Washington, D.C.

(800) 277-8088

Promotes recycling of drink boxes and milk cartons and provides resources for setting up school and residential recycling programs.

Center for Ecological Technology (CET)

Pittsfield & Northampton, MA

(413) 445-4556

Provides western Massachusetts with information, education, and services on recycling, energy, and waste management.

Chelsea Center for Recycling and Economic Development

Chelsea, MA

(617) 887-2300

Creates recycling jobs, supports recycling efforts in order to help the economy and the environment.

Composting Council

Alexandria, VA

(703) 739-2401

Provides information, educational materials, and resources on composting.

Container Recycling Institute

Washington, D.C.

(202) 797-6839

Provides recycling information for all types of beverage containers and technical assistance on ways to reduce container and packaging waste.

Council for Textile Recycling

Bethesda, MD

(301) 656-1077

Provides educational and resource information for recycling textiles or purchasing recycled textile products.

Earthworm, Inc.

Somerville, MA

(617) 628-1844

Provides information, education, and guidance on recycling programs for institutions, schools, and residents.

E-Call, The Massachusetts Recycling Hotline

Boston, MA

(800) 800-6881

(within 617)

(617) RECYCLE

Hotline service that provides the latest recycling information for cities and towns in Massachusetts.

Environmental Defense Fund

New York, NY

(800) CALLEDF

Call for recycling information and publications.

Fundamental Action to Conserve Energy (FACE)

Fitchburg, MA

(508) 345-5385

Provides conservation information on energy and recycling issues in north central Massachusetts.

Glass Packaging Institute

Washington, D.C.

(202) 887-4850

Provides market information and promotes the recycling of glass containers.

Institute of Scrap Recycling Industries

Washington, D.C.

(202) 737-1770

Provides information on all types of scrap recycling.

MassRecycle, The Massachusetts Recycling Coalition

Boston, MA

(617) 338-0244

A statewide coalition dedicated to promoting waste reduction, reuse, recycling, and recycled product procurement in Massachusetts. Publishes a newsletter, holds workshops and tours, and presents annual recycling awards.

National Electrical Manufacturers Association

Washington, D.C.

(703) 841-3200

Information on source reduction and recycling of batteries.

National Office Paper Recycling Project

U.S. Conference of Mayors

Washington, D.C.

(202) 861-6776

Publications on paper grades, office paper recycling, and purchasing of recycled papers.

National Recycling Coalition

Alexandria, VA

(703) 683-9025

A national coalition dedicated to recycling, source reduction, composting, market development, and recycled product procurement programs.

Publishes a newsletter with national market information. MassRecycle is the state affiliate.

National Solid Waste Management Association-NE Region

Natick, MA

(508) 650-0224

Information on solid waste and recycling.

Northeast Resource Recovery Association

Concord, NH

(603) 224-6996

A cooperative for the marketing of recyclables. Provides market information, education, and technical assistance about recycling for its members.

Paper Matcher: A Directory of Paper Recycling Markets

New York, NY

(212) 340-0600

A directory of paper markets in the U.S. Includes mills, paper dealers, and recycling centers.

Polystyrene Packaging Council

Washington, D.C.

(202) 371-2487

Provides market information and educational/resource materials about polystyrene recycling.

Scrap Tire Management Council

Washington, D.C.

(202) 408-7783

Provides market and resource information about scrap tire recycling.

Solid Waste Association of North America (SWANA)

Silver Springs, MD

(301) 585-2898

Provides up-to-date, reliable information about the rapidly changing solid waste field.

Steel Recycling Institute

Northeast Regional Office

Boxborough, MA

(508) 266-1847

Promotes steel recycling and provides educational materials to assist in program implementation.

WasteCap of Massachusetts

Boston, MA

(617) 236-7715

Provides business-helping-business recycling services and education at no cost.

RECYCLING RULES

Summary of Disposal Restrictions and Recycling Rules for Recyclable Paper, Plastic, Glass and Metal Containers, Leaves, Yard Wastes, White Goods, Whole Tires and Lead-Acid Batteries.

This document summarizes the recycling rules and waste disposal restrictions at 310 CMR 19.017 of the General Requirements, Procedures and Permits for Solid Waste Management Facilities, and the Municipal DEP-Approved Recycling and Composting Programs (DARP and DACP). For more details on disposal facility implementation and compliance requirements, please refer to the "Comprehensive Guidance to Solid Waste Disposal Facilities For Implementation of Disposal Restrictions -- Effective January 1, 1995" available from the DEP InfoLine at 617-338-2255. For questions concerning the DARP and DACP programs contact Peter Allison at 617-292-5980.

QUESTIONS & ANSWERS

Q. What are the "Recycling Rules"?

A. The "Recycling Rules," formerly referred to as "Waste Bans," are restrictions on the disposal of certain recyclable items at solid waste landfills and incinerators in Massachusetts. The rules are located in the state's solid waste facility management regulations, 310 CMR 19.017. Listed below are the restricted materials and their definitions:

| Material | Material Definition |
|--|---|
| Lead Batteries <i>effective date 12/31/90</i>  | Lead-acid batteries used in motor vehicles or stationary applications. |
| Leaves <i>effective date 12/31/91</i>  | Deciduous and coniferous leaves. |
| Whole Tires <i>effective date 12/31/91</i>  | Whole car and truck tires of all types. A tire can be landfilled only if it has been shredded or ground into at least four pieces so that it no longer has a circular shape. Disposal of whole tires are not restricted at combustion facilities. |
| White Goods <i>effective date 12/31/91</i>  | Large appliances including dish washers, refrigerators, freezers, clothes washers and dryers, gas or electric stoves, and water heaters. |
| Yard Waste <i>effective date 4/1/93</i>  | grass clippings, weeds, garden materials, shrub trimmings, and brush 1" or less in diameter (excluding diseased plants) |

| Material | Material Definition |
|---|--|
| Metal Containers <i>effective date 4/1/93</i>  | Aluminum, steel or bi-metal beverage and food containers. |
| Glass Containers <i>effective date 4/1/93</i>  | Glass bottles and jars excluding light bulbs, plate glass, ceramics, pyrex cookware, drinking glasses, windows, and windshields. |
| Single Resin Plastics <i>effective date 12/31/94</i>  | All plastic containers, of any resin type, which are narrow-necked such that the diameter of the opening is smaller than the diameter of the base (i.e., a soda bottle is "narrow-necked", but a yogurt container is not). |
| Recyclable Paper <i>effective date 12/31/94</i>  | All paper and paperboard products excluding tissue paper, toweling, paper plates, cups, and other low-grade paper products which become unusable to paper mills as a result of normal intended use (i.e., office paper, newspapers and cereal boxes, but not used paper towels). |

Note that other state and federal regulations limit and/or ban the disposal of additional materials at solid waste combustion facilities and landfills. Examples of these materials include hazardous wastes (as defined in 310 CMR 30), and infectious wastes.

Q. What is the Purpose of the Recycling Rules?

A. The Recycling Rules were designed to: 1) conserve capacity at existing disposal facilities, 2) minimize the need for new facility construction, and 3) signal recyclables markets that large volumes of material are available on a consistent basis. They also restrict certain toxic substances or materials which may adversely effect our environment when landfilled or incinerated.

Q. Whose Waste is Affected by the Recycling Rules?

A. The recycling rules apply to any solid waste destined for a Massachusetts Landfill or Combustion Facility, including all residential and commercial wastes. It is the responsibility of the disposal facility operator to ensure that only acceptable quantities of restricted materials are disposed of at their site.

Q. What Must a Disposal Facility Do to Comply with the Waste Restrictions?

A. A disposal facility operator must submit a compliance plan and establish an inspection program as outlined in the "Comprehensive Guidance to Solid Waste Disposal Facilities for Implementation of Disposal Restrictions" or implement a system for recovering restricted materials prior to disposal (front-end recovery system). An inspection program must include a schedule for random inspection of waste loads coming to the facility for disposal. An operator must also submit to DEP, as part of their compliance plan, a description of facility operations, assurance of posted signs informing facility users of the disposal restrictions, and annual inspection reports. DEP may perform spot checks on inspection days to make sure that inspections are being performed according to compliance plans.

Q. What Are Acceptable Quantities of Restricted Materials?

A. If a disposal facility operator finds restricted material in an inspected waste load above the de minimus quantities listed below, then that load is in violation of the disposal restrictions:

- Lead-acid Batteries, White Goods and Whole Tires (landfills only): unacceptable in any quantity;
- Unbagged Leaves and Yard Waste: must not exceed 10% of the waste load by volume;
- Bagged Leaves and Yard Waste: must not exceed de minimis standards for the following vehicle types: Transfer Trailer - 40 or more bags; Roll-off Container - 20 or more bags; Packer Truck - 10 or more bags; and Dump Truck or Smaller - 5 or more bags;
- Glass, Metal (steel, aluminum, bi-metal) and Narrow-Neck Plastic Containers (any resin type): must not exceed a combined de minimus quantity standard for glass, metal and plastic containers of 5 or fewer units per bag of refuse. Five refuse bags from each inspected load must be opened and checked. If at least 3 of the 5 bags contain more than 5 glass, metal or plastic container units, then that load is in violation, and;
- Recyclable Paper: must not exceed 20% of the waste load by volume or not more than 20% of 3 or more of 5 sampled bags. The 5 bag sample is most appropriately applied to residential waste loads where bagged refuse predominates, and should not be applied in order to avoid rejecting commercial loads with obviously high corrugated or office paper composition.

Q. What Must I Do to Bring My Waste Into Compliance with the Regulations?

A. Most communities and businesses have established recycling programs to bring their solid waste management programs into compliance with state regulations. Those that do not implement programs to divert banned items from their waste stream run the risk of having their waste rejected at the landfill or combustion facility.

Municipalities which apply for and satisfy DEP recycling criteria related to the community's commitment to recycling, public education efforts and residential access to recycling, may be awarded status as a DEP-Approved Recycling Program (DARP). DARP communities are not subject to inspection for recyclable paper or glass, metal and plastic containers and therefore will not have waste-loads rejected. Similarly, communities can also apply for status as a DEP-Approved Composting Program (DACP) status which exempts that community's waste from inspections for leaves and yard waste.

Q. How Does a Municipality Qualify for DARP or DACP Status?

A. To receive DARP or DACP status the municipality must complete an application in which the Chief Executive Officer certifies that the municipality's recycling or composting program satisfies several DEP criteria. The criteria cover matters such as whether recycling is mandatory, the collection of certain types of materials, public access hours and the extent of public education efforts. Municipalities must be able to document their claims if requested by DEP.

As DARP or DACP exemptions expire, communities must reapply to maintain their status. As of March 1995, over 300 communities have received DARP exemptions and over 170 are listed as DACP communities. Current minimum DARP and DACP criteria are listed in the tables below. Future DARP and DACP criteria may be expanded to match recycling market conditions and state-wide disposal capacity needs.

1995 - 1997 DARP CRITERIA:

| Program | Commitment | Education | Access |
|--------------------------|--|--|---|
| Curbside Programs | Collects newspaper plus one other type of paper, and, glass, metal and one type of plastic containers* | 1. Conducts annual mailing to residents, and uses quarterly media promotions or enacts a mandatory recycling by-law or, 2. Expend \$\$.25/ton of refuse disposed, or \$20,000 annually, in recycling education/outreach | Town or city-wide collection of paper & glass, metal and plastic containers on at least a bi-weekly basis |
| Drop-off Programs | Collects newspaper plus two other types of paper, and, glass, metal and two types of plastic containers* | 1. Conducts annual mailing to residents, and uses quarterly media promotions or enacts a mandatory recycling by-law, or; 2. Expend \$\$.25/ton of refuse disposed, or \$20,000 annually, in recycling education/outreach | Recycling drop-off area open to public either: 1. Same hours as refuse drop-off facility, or; 2. At least 20 hours per week |

* For example, a type of paper might be magazines, corrugated cardboard or office paper; a type of plastic containers might be PET containers, clear or colored HDPE, or other plastic container.

1995 DACP CRITERIA:

| Program | Commitment | Education | Access |
|---------------------------------------|--|--|---|
| Curbside and Drop-off Programs | 1. Enacted mandated source separation and composting of leaves and yard waste or excludes them from collection, or; 2. Has established collection program for leaves and yard waste, or; 3. Has a DEP-registered composting site | 1. Informs residents of exclusion of leaves and yard waste from disposal collection and provides information on home composting, or; 2. Through annual mailing promotes weekly drop-off, or curbside composting program and has run four announcements in the last year, or; 3. Expend \$\$.25/ton of refuse disposed, or \$20,000 annually, in recycling education/outreach | 1. Enforces an exclusion of leaves and yard waste from disposal, or; 2. Has a combination of weekly drop-off and/or curbside composting program available to residents from March through November, or; 3. Provides curbside collection of leaves and yard waste for four weeks in the spring and four weeks in the fall, and in the summer, offers drop-off composting or promotes home composting options |

Q. Can a City or Town from Outside of Massachusetts Obtain a DARP or DACP Exemption?

A. Yes, non-Massachusetts municipalities who submit an application to DEP and who comply with the above stated criteria can obtain DARP or DACP exemptions.

Q. Is a Business Exempt from Inspections if It Operates within a DARP or DACP Community?

A. No. Only waste handled as part of the Municipality's solid waste program is exempt from inspection.

Q. Is There Anything Like a DARP or a DACP for Business or Commercial Generators?

A. No. DEP explored possible mechanisms which would allow qualified commercial waste to be exempt from inspection at disposal facilities but not could find any that were viable or credible. As a result, commercial waste generators must institute programs or secure recycling services which will bring their refuse into compliance with the regulations or run the risk that their waste loads will be randomly inspected at their disposal site. DEP publishes an extensive "Recycling Services Directory" to assist businesses in locating recycling service providers. A Directory can be obtained by calling the DEP InfoLine at 617-338-2255.

As an additional resource, DEP sponsored the incorporation of WasteCap of Massachusetts, a statewide, non-profit, industry initiative that assists businesses and institutions in cost-effectively minimizing and recycling non-hazardous solid waste through business networking and a peer match program. For more information on WasteCap contact 617-236-7715.

Q. What Happens If My Community or Business Does Not Take Steps to Ensure that Our Waste Is In Compliance With State Regulations?

A. Landfill and combustion facility operators must perform random inspections of refuse trucks tipping at their sites. If an inspected waste load exceeds the acceptable level of restricted material the truck is prohibited from disposing at any Massachusetts landfill or combustion facility - unless the recyclable materials are first recovered or if reloading the vehicle would cause significant worker safety or facility disruption, and DEP approval is obtained through verbal contact with the regional office. Once a waste load has been rejected, the waste generator or hauler is likely to incur added costs in the forms of a reloading charge at the original disposal facility, a charge for culling recyclables from the mixed waste, or additional transport and tipping costs of disposing at the nearest available out-of-state facility. If your community or business does not recycle, your waste hauler may incorporate the risk of rejected loads into his or her service charges.

Commonwealth of Massachusetts
Operational Services Division
Environmental Purchasing Program

General Information

Since the late 1980s, the Commonwealth of Massachusetts has been committed to **increasing its purchases of products made with recycled materials, as well as other environmentally preferable products.** Through the combined efforts of the Operational Services Division (formerly Department of Procurement and General Services), Executive Office of Environmental Affairs and Department of Environmental Protection, the state has made great progress in this area.

Commonwealth Executive Agencies' Purchases of recycled products rose **from \$2.3 million in Fiscal Year 1992 to over \$21 million in Fiscal Year 1996.** By Fiscal Year 1997, OSD had established almost **2 dozen statewide contracts** for recycled and remanufactured products, including copier and printing paper, envelopes, trash bags, office supplies, toner cartridges, boxes, traffic cones, paint, motor oil, and others. The Commonwealth has committed to purchasing printing and writing paper which contains a minimum of 20% post-consumer content. More recently, OSD has begun efforts to expand purchases of environmentally preferable products to include such items as energy efficient office equipment and less toxic cleaners.

Services

OSD currently employs two full-time staff dedicated to providing information about recycled and other environmentally preferable products. Staff is available to any state agency, authority, municipality or other political subdivision to:

- answer questions about products
- provide lists of vendors
- help develop and write specifications
- conduct a presentation or workshop on site

OSD also maintains a **library of environmental product information**, including samples of products, vendor information and research materials. Call one of the OSD contacts to set up an appointment to visit the library.

Internet Page

OSD has also established an **environmental home page** with information about products, state contract listings and research documents. The page can be reached at <http://www.magnet.state.ma.us/osd/enviro/enviro.htm>

Resources

Available at no cost to all agencies and political subdivisions are a number of documents and reports which answer questions about environmental procurements, provide historical data, and outline existing state contracts for recycled products. To receive any of the following documents, proceed to the home page, or call, write or email one of the contacts listed below.

- Annual Report
- Recycled Product Guide To State Contracts
- Recycled Product Fact Sheets (Oil, Paint, Paper, Toner Cartridges)

Vendor Fair

Each year, OSD sponsors a **"Buy Recycled Vendor Fair and Conference,"** bringing together dozens of vendors with hundreds of purchasing officials and state and local employees, as well as Commonwealth businesses. This year's event will be held at the **Boxborough Woods Holiday Inn on Tuesday, November 18, 1997.**
